Article:	Annex:	Clause:	
Key words: Testing with higher loads			
Question: How shall following PPE tested when the manufacturer claims in the instructions a user weight greater than the standard 100 kg? <ul style="list-style-type: none">• Guided type fall arrester including a flexible anchorage line (EN 353-2:2002)• Energy absorber (EN355:2002)• Retractable type Fall arrester (EN360:2002) <i>Note: EN 353-1:2014 already requires test at maximum rated load</i>			
Solution: These equipments shall be dynamically tested based on relevant standard with standard load value and with value manufacturer gives. Values of standard have to be met. Note: in absence of specified claim for user weight, test shall be carried out with the 100kg mass
